ACCOUNTANT GENERAL'S OFFICE

CLASSIFICATIONS AND CHART OF ACCOUNTS

ISSUED MAY 2022 | UPDATED MAY 2024

FOREWORD

A Chart of Accounts (CoA) is a critical element of the Public Financial Management (PFM) framework for classifying, recording and reporting information on financial plans, transactions and events in a systematic and consistent way. It plays a key role in government fiscal planning, financial management, accountability and financial reporting frameworks.

The Government of Uganda (GoU) decided in 2002, in line with many other countries, to adopt systems that will enable it to conform to International Public Sector Accounting Standards. One of such systems was the Government Finance Statistics (GFS) for the compilation and presentation of fiscal statistics. GFS Manual compliant COA was developed and issued in 2002 to promote accountability and transparency in Government finances, operations and oversight.

However, a lot of events/ reforms have since taken place including the shift from output based budgeting to program based budgeting enshrined in NDPIII, the need to transit and comply with the IPSAS standards and the need to comply with the requirements of GFS manual 2014 that replaced the GFS 2001.

The above have necessitated the review of the old Chart of Accounts issued in 2002. The review benefitted from widespread consultations from various stakeholders and is compliant with both the Government of Uganda legal and regulatory framework and the GFS Manual 2014.

The structure of this chart has 9 segments with a total of 43 digits from the 9 segments and 38 digits in the previous COA. New segments like the Program and Geographical location have been created and the vote cost center segment enhanced.

Please note that the COA will always be updated from time to time to incorporate changes resulting from policy shifts and to align it with best practices.
